Why spend six months studying, when you can pass the PMP in 5 days?

Are you a project manager who knows the value of time? If so, this course is designed for you. We offer a week-long immersion approach, using advanced accelerated exam prep techniques. You'll finish the course by actually taking the PMI PMP Certification Exam. You'll spend 4 days, or 36 hours in the classroom, preparing for the exam, and then schedule your exam on the fifth day at a Prometric test in Almaty. For your convenience, we set up our programs near Prometric test centers.

* Without this course, many people have to spend three to nine months to prepare for this exam.

*To insure you can take the exam the last day of class, you should register at least eight weeks prior to the course. If you register later, you can still take the class, but depending on the availability of space at the Prometric facility near the course you may have to take the exam on Monday or Tuesday of the following week in your hometown. While it is best to take the exam on Friday, taking it early the following week should not in any way impact your performance.

What type of people take this course?

Good project managers who are resourceful, understand the real cost of their time, and recognize that this approach significantly reduces their risks with pursuing the PMP.

We guarantee you'll pass

We guarantee that you'll pass the PMP exam after participating in the online course orientation class and the in-classroom accelerated PMP exam preparation program. If you do not pass the PMP exam, your instructor will create a follow-up coaching program to help you on your weak areas, and then will help you to reschedule your exam within the next two to three weeks. We'll cover the cost of the exam retake two times within four months of your original test date. In the event you do not pass the PMP exam after the third attempt, we will fully refund the fee you paid us to take the course. If you fail the exam, you can also retake the course at no additional charge within two months of your original course date.

No previous training is needed to register

The only pre-requisite for the course is that you have your PMI eligibility letter to sit for the exam. Since the course provides an intense week of training, you must be prepared to completely immerse yourself in the program so that you can be sure you pass the exam. PMI now requires 35 hours of PM training prior to applying for the PMP exam. You don't already have the 35 hours of PM training? No worries — our PMP prep course includes online pre-course orientation materials that can be used to satisfy the 35 hour requirement, if you need it. Just factor in the complete online course orientation class that takes 35 hours prior to filling out your PMI eligibility application. You can easily complete the online orientation class in less than a week. You'll simply perform the activities as a normal part of your day to day life, and then complete the filing of your online application with PMI when you're finished. The work you do as

part of the online course is work you would have had to do to fill out the eligibility application — and it will prepare you physically and mentally for the course.

We'll teach you what you need to know to pass the PMP Certification Exam

The course includes:

- PMBOK Content-- the 5 major PM processes and 9 PM Knowledge Areas
- Mnemonics for instant recall of the PMBOK content
- Test taking strategies for the PMP Certification Exam
- Study aids to improve your ability to instantly recall PMBOK content for the exam
- Activities to speed recall of key PMBOK concepts

The four days are highly interactive with every activity done to insure your success with passing the PMP Certification Exam.

The ultimate in risk-free, time-efficient certification prep

The Cheetah Exam Prep for the PMP was developed by leaders in accelerated learning, memory, and instant recall, and project management professionals. With this course, you get fully prepared to take the exam through coaching offered both before and during the course, and then at the end of the week you'll take the exam. This approach differs radically from other exam prep methods. The pre-exam coaching, pre-course orientation class, and Cheetah Accelerator Toolkit for the PMP all teach you what you need to do in order to prepare yourself for the exam. The course itself is an intensive four-day immersion approach to make sure that you are ready to pass the PMI PMP exam on the fifth day.
